$8 - Field link and sequence number (R)

FIELD DEFINITION AND SCOPE

Formatted number used for sound recordings, printed music, and videorecordings. Publisher's numbers that are given in an unformatted form are recorded in field 500 (General Note). A print constant identifying the kind of publisher number may be generated based on the value in the first indicator position.

Numbers that are identified as stock numbers are recorded in field 037 (Source of Acquisition). In case of doubt as to whether a number is a publisher's number, record the number in field 500 or 037. Repeatable for multiple numbers associated with an item.

GUIDELINES FOR APPLYING CONTENT DESIGNATORS

■ INDICATORS

First Indicator - Type of publisher number

Second Indicator - Note/added entry controller
Whether a note and/or an added entry generated from the content of this field is required for display.

0 - No note, no added entry
Neither a note or an added entry needs to be generated.

RECORDED BOOKS, LLC

—WITH TRACKS EVERY 3 MINUTES FOR EASY BOOK MARKING—

IMMORTAL IN DEATH

Writing as J.D. Robb, *New York Times* best-selling author Nora Roberts exhilarates readers b
weaving romance and suspense into irresistible stories. *Immortal in Death*, from the futuristic s
police lieutenant Eve Dallas, is an engrossing tale of sex, drugs and unchecked ambition.

A top fashion model is murdered, and Eve's best friend, the other woman in a fatal love trian
mary suspect. Searching for the truth, Eve infiltrates New York City's drug-infested underworld. V
is a culture obsessed with youth and fame, where powerful drugs are available to fulfill any desire—
willing to risk their lives.

Always inventive, Robb combines all the elements of a top-notch thriller with her insightful visi
future. Narrator Cristine McMurdo-Wallis provides a confident voice for the strong-willed, street-wise Eve.

"Wonderful … If ever there was a book for all tastes, this is the one."—**Affaire de Coeur**

"Richly imagined suspense."—**Publishers Weekly**

Narrator Cristine McMurdo-Wallis

After an early professional debut on the stage, Cristine played in summer stock theater during college. Graduating with a BA in theater, she taught theater, received grants to run theaters, and toured with many productions. Cristine has appeared in *Dancing at*

$j - Language code of subtitles or captions (R)
$2 - Source of code (NR)
$6 - Linkage (NR)
$8 - Field link and sequence number (R)

FIELD DEFINITION AND SCOPE

Codes for languages associated with an item when the language code in field 008/35-37 of the record is insufficient to convey full information. Includes records for multilingual items, items that involve translation, and items where the medium of communication is a sign language. Sources of the codes are: *MARC Code List for Languages* or other code lists such as ISO 639-1 (*Codes for the representation of names of languages - Part 1: alpha-2 code*).

Languages may also be recorded in textual form in field 546 (Language Note).

Used in conjunction with 008/35-37 (Language). If there is a code in 008/35-37, it is recorded as the first code in subfields $a or $d (for sound recordings) of field 041. If 008/35-37 contains all blanks (No information provided) or the code "zxx" (No linguistic content) and field 041 is being used, e.g., to record the language code(s) of accompanying material, no subfield $a or $d is present. If only a non-MARC code is used to express the predominant language in an item, field 008/35-37 is coded with three fill characters (|).

Used when one or more of the following conditions exist:

- The item contains more than one language one of which may be a sign language
- The item is or includes a translation
- The language of the summaries, abstracts, or accompanying material differs from the language of the main item
- The language of a table of contents differs from the language of the main item

Definition Call numbers based on LC classification schedules, but assigned locally. If you are transcribing LC copy, use field 050 for the LC-assigned call number. Use field 055, field 060 or field 070 for call numbers based on LC classification schedules but assigned by the National Library of Canada (NLC), the National Library of Medicine (NLM) or the National Agricultural Library (NAL).

Records may contain field 050 and field 090, but only if field 050 is a word or phrase (e.g., PAR, Newspaper, UNC, or NOT IN LC). Field 090 is **not** retained in the master record if field 050 contains a call number.

If you assign a Library of Congress classification number according to the LC class schedules, use field 090 or field 050 with indicators "14." If the classification portion of your number does not conform to the LC class schedules, use field 099.

MARC 21 Concise Format for Bibliographic Data: 008 All Materials (Network Development and MARC - Windows Internet Explorer

008 - All Materials (NR)

MARC 21 Bibliographic - Concise 2007

Character Positions

00-05 - Date entered on file
Computer-generated, six-character numeric string that indicates the date the MARC record was created. Recorded in the pattern *yymmdd*.

06 - Type of date/Publication status
One-character alphabetic code that indicates that categorizes the type of dates given in 008/07-10 (Date 1) and 008/11-14 (Date 2). For continuing resources, the code in 008/06 also indicates the publication status.
The choice of code for 008/06 is made concurrently with a determination of the appropriate dates for 008/07-14. For most records data is derived from information in field 260 (Publication, Distribution, etc. (Imprint)), field 362 (Dates of Publication and/or Sequential Designation), or from note fields.
b - No dates given; B.C. date involved
Each character position in fields 008/07-10 and 008/11-14 contains a blank.
c - Continuing resource currently published
008/07-10 contain the beginning date of publication; 008/11-14 contain the characters *9999*.
d - Continuing resource ceased publication
008/07-10 contain the beginning date of publication; 008/11-14 contain the date the item ceased to be published.
e - Detailed date
008/07-10 contain the year and 008/11-14 contain the month and day formatted *mmdd*.
i - Inclusive dates of collection
k - Range of years of bulk of collection
m - Multiple dates
008/07-10 usually contain the initial (or beginning) date and 008/11-14 the terminal (or ending) date.
n - Dates unknown
Dates appropriate for 008/07-10 and 008/11-14 are unknown, (e.g., when no dates are given in field 260).
p - Date of distribution/release/issue and production/recording session when different
q - Questionable date
Earliest possible date is given in 008/07-10; latest possible date in 008/11-14.
r - Reprint/reissue date and original date
008/07-10 contain the date of reproduction or reissue; 008/11-14 contain the date of the original, if known. 008/11-14 contain code u ("uuuu"), if unknown.
s - Single known date/probable date
008/07-10 contain the date; 008/11-14 contain blanks (####).
t - Publication date and copyright date
u - Continuing resource status unknown
008/07-10 contain a beginning date of publication; 008/11-14 contain the characters uuuu since no ending date is known.

MARC 21 Concise Format for Bibliographic Data: 008 All Materials (Network Development and MARC - Windows Internet Explorer

u - Date element is totally or partially unknown
|| - No attempt to code

15-17 - Place of publication, production, or execution
Two- or three-character alphabetic code that indicates the place of publication, production, or execution. Place code is an authoritative-agency data element. Code from: *MARC Code List for Countries*. Choice of a MARC code is generally related to information in field 260 (Publication, Distribution, etc. (Imprint)). The code recorded in 008/15-17 is used in conjunction with field 044 (Country of Producer Code) when more than one code is appropriate to an item. The first code in subfield $a of field 044 is recorded in 008/15-17. Three fill characters (|||) may be used in place of a valid code, but their use in 008/15-17 is discouraged. The data in this field 008 data element is used for retrieval and duplicate detection in many systems. When fill is used in 008/15-17, all three positions must contain the fill character.

35-37 - Language
Three-character alphabetic code that indicates the language of the item. Code from: *MARC Code List for Languages*. Choice of a MARC code is based on the predominant language of the item. Three fill characters (|||) may also be used if no attempt is made to code the language or if non-MARC language coding is preferred (and coded in field 041 (Language code)).

38 - Modified record
One-character code that indicates whether any data in a bibliographic record is a modification of information that appeared on the item being cataloged or that was intended to be included in the MARC record.
Codes are assigned a priority (recorded in the order of the following list) that determines which code is input when more than one code applies to the item.
 # - Not modified
d - Dashed-on information omitted
o - Completely romanized/printed cards romanized
r - Completely romanized/printed cards in script
s - Shortened
Some of the data was omitted because the data exceeded the maximum length allowed by the system used to create or process it.
x - Missing characters
Record contained characters that could not be converted to machine-readable form (e.g., incidental nonroman characters on predominantly roman alphabet records, mathematical symbols, etc.).
| - No attempt to code

39 - Cataloging source
One-character code that indicates the original cataloging source of the record. If the cataloging source is known, it is identified in subfield $a of field 040 (Cataloging Source).
 # - National bibliographic agency
c - Cooperative cataloging program
Creator of the cataloging data is a participant (other than a national bibliographic agency) in a cooperative cataloging program.
d - Other
u - Unknown
| - No attempt to code

23 - Form of item (006/06)
One-character alphabetic code that specifies the form of material for the item.

- # - None of the following
- a - Microfilm
- b - Microfiche
- c - Micropaque
- d - Large print
- f - Braille
- r - Regular print reproduction
  Eye-readable print, such as a photocopy.
- s - Electronic
- | - No attempt to code

24-27 - Nature of contents (006/07-10)
Up to four one-character codes (recorded in alphabetical order) that indicate whether a significant part of the item is or contains certain types of material. If fewer than four codes are assigned, the codes are left justified and unused positions contain blanks (#).

- # - No specified nature of contents
- a - Abstracts/summaries
  Abstracts or summaries of other publications. Not used when a publication includes an abstract or summary of its own content.
- b - Bibliographies
- c - Catalogs
  Also includes lists of collectible objects, such as stamps and coins, or trade catalogs, etc. For catalogs of books, sound recordings, or motion pictures, code b (Bibliographies), code k (Discographies), or code q (Filmographies), are given with code c.
- d - Dictionaries
- e - Encyclopedias
- f - Handbooks
- g - Legal articles
- i - Indexes
  Index to bibliographical material *other* than itself.
- j - Patent document
- k - Discographies
- l - Legislation
  Full or partial texts of enactments of legislative bodies, published either in statute or in code form, or texts of rules and regulations issued by executive or administrative agencies.
- m - Theses
  Thesis, dissertation, or work identified as having been created to satisfy the requirements for an academic certification or degree.
- n - Surveys of literature in a subject area
  Composed entirely of authored surveys that summarize what has been published about a subject.

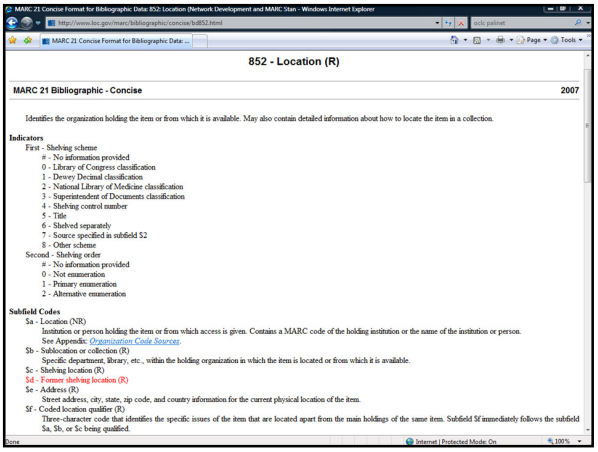
DEFINITION AND SCOPE



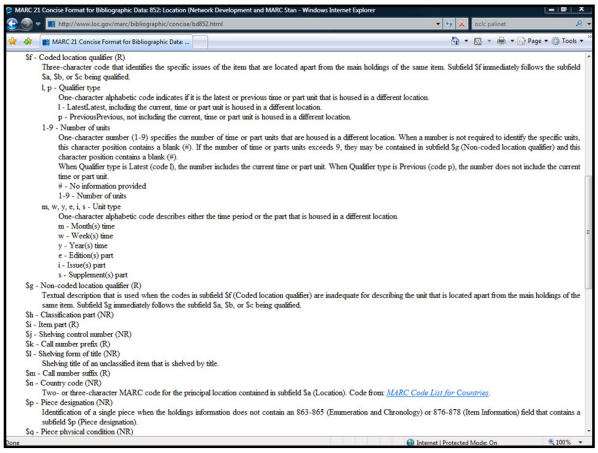
852 - Location (R)

MARC 21 Bibliographic - Concise — 2007

Identifies the organization holding the item or from which it is available. May also contain detailed information about how to locate the item in a collection.

Indicators
First - Shelving scheme
- No information provided
0 - Library of Congress classification
1 - Dewey Decimal classification
2 - National Library of Medicine classification
3 - Superintendent of Documents classification
4 - Shelving control number
5 - Title
6 - Shelved separately
7 - Source specified in subfield $2
8 - Other scheme
Second - Shelving order
- No information provided
0 - Not enumeration
1 - Primary enumeration
2 - Alternative enumeration

Subfield Codes
$a - Location (NR)
Institution or person holding the item or from which access is given. Contains a MARC code of the holding institution or the name of the institution or person.
See Appendix: *Organization Code Sources*.
$b - Sublocation or collection (R)
Specific department, library, etc., within the holding organization in which the item is located or from which it is available.
$c - Shelving location (R)
$d - Former shelving location (R)
$e - Address (R)
Street address, city, state, zip code, and country information for the current physical location of the item.
$f - Coded location qualifier (R)
Three-character code that identifies the specific issues of the item that are located apart from the main holdings of the same item. Subfield $f immediately follows the subfield $a, $b, or $c being qualified.



$f - Coded location qualifier (R)
Three-character code that identifies the specific issues of the item that are located apart from the main holdings of the same item. Subfield $f immediately follows the subfield $a, $b, or $c being qualified.
l, p - Qualifier type
One-character alphabetic code indicates if it is the latest or previous time or part unit that is housed in a different location.
l - Latest/Latest, including the current, time or part unit is housed in a different location.
p - Previous/Previous, not including the current, time or part unit is housed in a different location.
1-9 - Number of units
One-character number (1-9) specifies the number of time or part units that are housed in a different location. When a number is not required to identify the specific units, this character position contains a blank (#). If the number of time or parts units exceeds 9, they may be contained in subfield $g (Non-coded location qualifier) and this character position contains a blank (#).
When Qualifier type is Latest (code l), the number includes the current time or part unit. When Qualifier type is Previous (code p), the number does not include the current time or part unit.
- No information provided
1-9 - Number of units
m, w, y, e, i, s - Unit type
One-character alphabetic code describes either the time period or the part that is housed in a different location.
m - Month(s) time
w - Week(s) time
y - Year(s) time
e - Edition(s) part
i - Issue(s) part
s - Supplement(s) part
$g - Non-coded location qualifier (R)
Textual description that is used when the codes in subfield $f (Coded location qualifier) are inadequate for describing the unit that is located apart from the main holdings of the same item. Subfield $g immediately follows the subfield $a, $b, or $c being qualified.
$h - Classification part (NR)
$i - Item part (R)
$j - Shelving control number (NR)
$k - Call number prefix (R)
$l - Shelving form of title (NR)
Shelving title of an unclassified item that is shelved by title.
$m - Call number suffix (R)
$n - Country code (NR)
Two- or three-character MARC code for the principal location contained in subfield $a (Location). Code from: *MARC Code List for Countries*.
$p - Piece designation (NR)
Identification of a single piece when the holdings information does not contain an 863-865 (Enumeration and Chronology) or 876-878 (Item Information) field that contains a subfield $p (Piece designation).
$q - Piece physical condition (NR)

$q - Piece physical condition (NR)
Description of any unusual characteristic of the physical condition of the piece when the holdings information does not contain an 863-865 (Enumeration and Chronology) or 876-878 (Item Information) field that contains a subfield $q (Piece physical condition).
$s - Copyright article-fee code (R)
$t - Copy number (NR)
Copy number or a range of numbers for copies that have the same location and call number when the holdings information does not contain an 863-865 Enumeration and Chronology field that contains subfield $t (Copy number).
$u - Uniform Resource Identifier (R)
Uniform Resource Identifier (URI), for example a URL or URN, which provides electronic access data in a standard syntax. The URI links to the repository that holds the item (regardless of whether the item is analog or digital). This information may also be recorded as an organization code or text in subfield $a (Location) and (if applicable) subfield $b (Sublocation).
$x - Nonpublic note (R)
$z - Public note (R)
$2 - Source of classification or shelving scheme (NR)
MARC code that identifies the source from which the classification or shelving was assigned. It is used only when the first indicator position contains value 7 (Source specified in subfield $2). Code from: *MARC Code Lists for Relators, Sources, Description Conventions*.
$3 - Materials specified (NR)
$6 - Linkage (NR)
See description of this subfield in Appendix A: *Control Subfields*.
$8 - Sequence number (NR)
To sequence related holdings records, see field 852, subfield $8 in the *MARC 21 Format for Holdings Data*.

856 - Electronic Location and Access (R)

MARC 21 Bibliographic - Concise 2007

Information needed to locate and access an electronic resource. The field may be used in a bibliographic record for a resource when that resource or a subset of it is available electronically. In addition, it may be used to locate and access an electronic version of a non-electronic resource described in the bibliographic record or a related electronic resource.

See the *Guidelines for the Use of Field 856* for a more thorough discussion on the use of field 856.

Field 856 is repeated when the location data elements vary (the URL in subfield $u or subfields $a, $b, $d, when used). It is also repeated when more than one access method is used, different portions of the item are available electronically, mirror sites are recorded, different formats/resolutions with different URLs are indicated, and related items are recorded.

Indicators

First - Access method
- # - No information provided
- 0 - Email
- 1 - FTP
- 2 - Remote login (Telnet)
- 3 - Dial-up
- 4 - HTTP
- 7 - Method specified in subfield $2

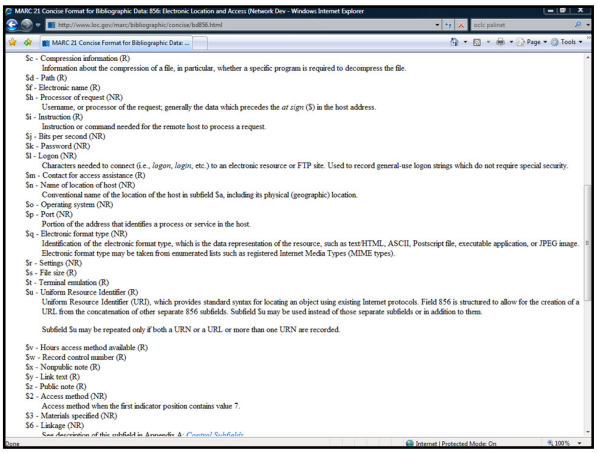
Second - Relationship
- # - No information provided
- 0 - Resource
- 1 - Version of resource
- 2 - Related resource
- 8 - No display constant generated

Subfield Codes

$a - Host name (R)
Fully qualified domain (host name) of the electronic location. It contains a network address which is repeated if there is more than one address for the same host.

$b - Access number (R)
Access number associated with a host. It can contain the Internet Protocol (IP) numeric address if the item is an Internet resource, or a telephone number if dial-up access is provided through a telephone line. This data may change frequently and may be generated by the system, rather than statically stored.

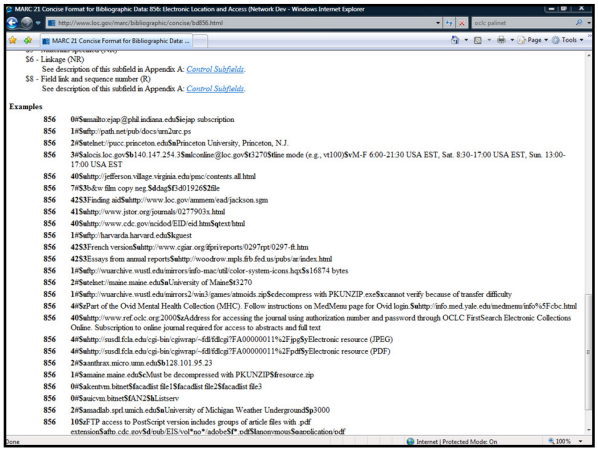
$c - Compression information (R)



$c - Compression information (R)
Information about the compression of a file, in particular, whether a specific program is required to decompress the file.
$d - Path (R)
$f - Electronic name (R)
$h - Processor of request (NR)
Username, or processor of the request; generally the data which precedes the *at sign* (@) in the host address.
$i - Instruction (R)
Instruction or command needed for the remote host to process a request.
$j - Bits per second (NR)
$k - Password (NR)
$l - Logon (NR)
Characters needed to connect (i.e., *logon, login*, etc.) to an electronic resource or FTP site. Used to record general-use logon strings which do not require special security.
$m - Contact for access assistance (R)
$n - Name of location of host (NR)
Conventional name of the location of the host in subfield $a, including its physical (geographic) location.
$o - Operating system (NR)
$p - Port (NR)
Portion of the address that identifies a process or service in the host.
$q - Electronic format type (NR)
Identification of the electronic format type, which is the data representation of the resource, such as text/HTML, ASCII, Postscript file, executable application, or JPEG image. Electronic format type may be taken from enumerated lists such as registered Internet Media Types (MIME types).
$r - Settings (NR)
$s - File size (R)
$t - Terminal emulation (R)
$u - Uniform Resource Identifier (R)
Uniform Resource Identifier (URI), which provides standard syntax for locating an object using existing Internet protocols. Field 856 is structured to allow for the creation of a URL from the concatenation of other separate 856 subfields. Subfield $u may be used instead of those separate subfields or in addition to them.

Subfield $u may be repeated only if both a URN or a URL or more than one URN are recorded.

$v - Hours access method available (R)
$w - Record control number (R)
$x - Nonpublic note (R)
$y - Link text (R)
$z - Public note (R)
$2 - Access method (NR)
Access method when the first indicator position contains value 7.
$3 - Materials specified (NR)
$6 - Linkage (NR)
See description of this subfield in Appendix A: *Control Subfields*



$6 - Linkage (NR)
See description of this subfield in Appendix A: *Control Subfields*
$8 - Field link and sequence number (R)
See description of this subfield in Appendix A: *Control Subfields*
