022-ISSN (International Standard Serial Number)

- 022 \$a 1532-2882

The screenshot shows a web browser window with the title "MARC 21 Format for Bibliographic Data: 028: Publisher Number (Network Development and MARC Stan - Windows Internet Explorer)". The address bar shows the URL "http://www.loc.gov/marc/bibliographic/bd028.html". The page content is as follows:

028 - Publisher Number (R)

MARC 21 Bibliographic - Full October 2001

First Indicator	Second Indicator
<i>Type of publisher number</i>	<i>Note/added entry controller</i>
0 - Issue number	0 - No note, no added entry
1 - Matrix number	1 - Note, added entry
2 - Plate number	2 - Note, no added entry
3 - Other music number	3 - No note, added entry
4 - Videorecording number	
5 - Other publisher number	

Subfield Codes

Sa - Publisher number (NR)	\$6 - Linkage (NR)
Sb - Source (NR)	\$8 - Field link and sequence number (R)

FIELD DEFINITION AND SCOPE

Formatted number used for sound recordings, printed music, and videorecordings. Publisher's numbers that are given in an unformatted form are recorded in field 500 (General Note). A print constant identifying the kind of publisher number may be generated based on the value in the first indicator position.

Numbers that are identified as stock numbers are recorded in field 037 (Source of Acquisition). In case of doubt as to whether a number is a publisher's number, record the number in field 500 or 037. Repeatable for multiple numbers associated with an item.

GUIDELINES FOR APPLYING CONTENT DESIGNATORS

■ INDICATORS

First Indicator - Type of publisher number

Second Indicator - Note/added entry controller
Whether a note and/or an added entry generated from the content of this field is required for display.

0 - No note, no added entry
Neither a note or an added entry needs to be generated.

RECORDED BOOKS, LLC

—WITH TRACKS EVERY 3 MINUTES FOR EASY BOOK MARKING—

IMMORTAL IN DEATH

Writing as J.D. Robb, *New York Times* best-selling author Nora Roberts exhilarates readers by weaving romance and suspense into irresistible stories. *Immortal in Death*, from the futuristic sci-fi series, is an engrossing tale of sex, drugs and unchecked ambition.

A top fashion model is murdered, and Eve's best friend, the other woman in a fatal love triangle, is the primary suspect. Searching for the truth, Eve infiltrates New York City's drug-infested underworld. What is a culture obsessed with youth and fame, where powerful drugs are available to fulfill any desire—is it worth the price? Willing to risk their lives.

Always inventive, Robb combines all the elements of a top-notch thriller with her insightful vision of the future. Narrator Cristine McMurdo-Wallis provides a confident voice for the strong-willed, street-wise Eve.

"Wonderful ... If ever there was a book for all tastes, this is the one."—**Affaire de Coeur**

"Richly imagined suspense."—**Publishers Weekly**

Narrator Cristine McMurdo-Wallis

After an early professional debut on the stage, Cristine played in summer stock theater during college. Graduating with a BA in theater, she taught theater, received grants to run theaters, and toured with many productions. Cristine has appeared in *Dancing at*

MARC 21 Format for Bibliographic Data: 041: Lan...

041 - Language Code (R)

200710

MARC 21 Bibliographic - Full

First Indicator <i>Translation indication</i>	Second Indicator <i>Source of code</i>
0 - Item not a translation/does not include a translation	# - MARC language code
1 - Item is or includes a translation	7 - Source specified in subfield \$2

Subfield Codes

Sa - Language code of text/sound track or separate title (R)	Sh - Language code of original and/or intermediate translations of text (R)
Sb - Language code of summary or abstract (R)	Sj - Language code of subtitles or captions (R)
Sd - Language code of sung or spoken text (R)	\$2 - Source of code (NR)
Se - Language code of librettos (R)	\$6 - Linkage (NR)
Sf - Language code of table of contents (R)	\$8 - Field link and sequence number (R)
Sg - Language code of accompanying material other than librettos (R)	

FIELD DEFINITION AND SCOPE

Codes for languages associated with an item when the language code in field 008/35-37 of the record is insufficient to convey full information. Includes records for multilingual items, items that involve translation, and items where the medium of communication is a sign language. Sources of the codes are: [MARC Code List for Languages](#) or other code lists such as ISO 639-1 (*Codes for the representation of names of languages - Part 1 : alpha-2 code*).

Languages may also be recorded in textual form in field 546 (Language Note).

Used in conjunction with 008/35-37 (Language). If there is a code in 008/35-37, it is recorded as the first code in subfields Sa or Sd (for sound recordings) of field 041. If 008/35-37 contains all blanks (No information provided) or the code "zxx" (No linguistic content) and field 041 is being used, e.g., to record the language code(s) of accompanying material, no subfield Sa or Sd is present. If only a non-MARC code is used to express the predominant language in an item, field 008/35-37 is coded with three fill characters (| | |).

Used when one or more of the following conditions exist:

- The item contains more than one language one of which may be a sign language
- The item is or includes a translation
- The language of the summaries, abstracts, or accompanying material differs from the language of the main item
- The language of a table of contents differs from the language of the main item

DEFINITION AND SCOPE

Fields 01X-09X contain standard numbers, classification numbers, codes, and other data elements relating to the record.

CONTENT DESIGNATOR HISTORY

Field 011 - Linking Library of Congress Control Number (BK, MP, MU, VM, SE, USMARC only) [OBSOLETE, 1993]
Both indicator positions were undefined. A subfield \$a (Linking LC control number) was defined. Linking Library of Congress control numbers may be recorded in the 760-787 linking entry fields.

Field 026 - Fingerprint Identifier [NEW, 2002]

Field 031 - Musical Incipits Information [NEW, 2004]

Field 038 - Record Content Licensor [NEW, 2002]

Field 039 - Level of Bibliographic Control and Coding Detail [OBSOLETE, 1986]
Field 039 was made obsolete when Leader17 (Encoding level) code 7 was redefined to identify cataloging that conforms to national minimal level requirements. Field 039 was defined in 1980 to allow an organization to characterize the fullness of various cataloging aspects of records contributed to a national database.

First indicator position specified the standard against which the data were applied (0 = U.S. national level bibliographic record; 8 = Other); the second indicator was undefined. The subfield codes and the defined codes for each were: \$a Level of rules used in bibliographic description (0 = No level defined by rules, 1 = Minimal, 2 = Less than full, 3 = Full); \$b Level of effort used to assign nonsubject heading access points (2 = Less than full, 3 = Full); \$c Level of effort used to assign subject headings (0 = None, 2 = Less than full, 3 = Full); \$d Level of effort used to assign classification (0 = None, 2 = Less than full, 3 = Full); \$e Number of fixed field character positions coded (0 = None, 1 = Minimal, 2 = Most necessary, 3 = Full).

Subfield Codes

\$a - Classification number (R)	\$6 - Linkage (NR)
\$b - Item number (NR)	\$8 - Field link and sequence number (R)
\$3 - Materials specified (NR)	

FIELD DEFINITION AND SCOPE

Classification or call number that is taken from *Library of Congress Classification* or *LC Classification Additions and Changes*. The brackets that customarily surround alternate class/call numbers are not carried in the MARC record; they may be generated based on the presence of repeated \$a subfields.

Second indicator values distinguish between content actually assigned by the Library of Congress and content assigned by an organization other than LC.

Note that only subfield \$u is locally defined. The entire field description is repeated here for ease of use of this document.

GUIDELINES FOR APPLYING CONTENT DESIGNATORS

■ INDICATORS

First Indicator - Existence in LC collection
Whether or not the item is contained in the LC collections.

- No information provided
Used for all call numbers assigned by agencies other than the Library of Congress.

Library of Congress >> MARC >> Bibliographic >> 01X-09X >> 082

082 - Dewey Decimal Classification Number (R)

MARC 21 Bibliographic - Concise 2007

Classification number is taken from *Dewey Decimal Classification and Relative Index*, the *Abridged Dewey Decimal Classification and Relative Index*, and electronic updates to either edition. Through 1997, updates were issued in *DC & Dewey Decimal Classification Additions, Notes and Decisions*.

Definition
Call numbers based on LC classification schedules, but assigned locally. If you are transcribing LC copy, use [field 050](#) for the LC-assigned call number. Use [field 055](#), [field 060](#) or [field 070](#) for call numbers based on LC classification schedules but assigned by the National Library of Canada (NLC), the National Library of Medicine (NLM) or the National Agricultural Library (NAL).
Records may contain [field 050](#) and field 090, but only if [field 050](#) is a word or phrase (e.g., PAR, Newspaper, UNC, or NOT IN LC). Field 090 is **not** retained in the master record if [field 050](#) contains a call number.
If you assign a Library of Congress classification number according to the LC class schedules, use field 090 or [field 050](#) with indicators "14." If the classification portion of your number does not conform to the LC class schedules, use [field 099](#).

Definition

Call numbers based on Dewey Decimal Classification. If you are transcribing LC copy or Canadian Cataloging-in-Publication, use [field 082](#) for Dewey numbers assigned by LC or Library and Archives Canada. Only [field 082](#) remains with the master record if a new record has [field 082](#) and 092. Field 092 is retained in archive records, institution records, OCLC-MARC records, and exported records.

If you assign a Dewey Decimal Classification number according to the DDC schedules or to LC practice, use [field 092](#) or [field 082](#) with 2nd indicator 4. If the classification portion of your number does not conform to the DDC schedules, use [field 099](#).

Definition

The local free-text call numbers based on a unique local system. You may also use field 099 for other call numbers that cannot be formatted for printing in the appropriate call number field. For example, use field 099 for complex LC call numbers that cause unit (zc) cards, or to format a Government Document number on two or more lines.

If you are creating new records, use the appropriate field (e.g., [field 050](#) or [field 086](#)) for call numbers, even if you repeat the same number in field 099 for printing.

Field 099 does **not** remain in the master record. It is retained in archive records, institution records, OCLC-MARC records, and exported records.

MARC 21 Concise Format for Bibliographic Data: 008: All Materials (Network Development and MARC - Windows Internet Explorer)

http://www.loc.gov/marc/bibliographic/concise/bd008a.html

MARC 21 Concise Format for Bibliographic Data: ...

008 - All Materials (NR)

MARC 21 Bibliographic - Concise 2007

Character Positions

00-05 - Date entered on file
Computer-generated, six-character numeric string that indicates the date the MARC record was created. Recorded in the pattern *yyymmdd*.

06 - Type of date/Publication status
One-character alphabetic code that indicates that categorizes the type of dates given in 008/07-10 (Date 1) and 008/11-14 (Date 2). For continuing resources, the code in 008/06 also indicates the publication status.
The choice of code for 008/06 is made concurrently with a determination of the appropriate dates for 008/07-14. For most records data is derived from information in field 260 (Publication, Distribution, etc. (Imprint)), field 362 (Dates of Publication and/or Sequential Designation), or from note fields.

b - No dates given; B.C. date involved
Each character position in fields 008/07-10 and 008/11-14 contains a blank.

c - Continuing resource currently published
008/07-10 contain the beginning date of publication; 008/11-14 contain the characters *9999*.

d - Continuing resource ceased publication
008/07-10 contain the beginning date of publication; 008/11-14 contain the date the item ceased to be published.

e - Detailed date
008/07-10 contain the year and 008/11-14 contain the month and day formatted *mddd*.

i - Inclusive dates of collection

k - Range of years of bulk of collection

m - Multiple dates
008/07-10 usually contain the initial (or beginning) date and 008/11-14 the terminal (or ending) date.

n - Dates unknown
Dates appropriate for 008/07-10 and 008/11-14 are unknown, (e.g., when no dates are given in field 260).

p - Date of distribution/release/issue and production/recording session when different

q - Questionable date
Earliest possible date is given in 008/07-10; latest possible date in 008/11-14.

r - Reprint/reissue date and original date
008/07-10 contain the date of reproduction or reissue; 008/11-14 contain the date of the original, if known. 008/11-14 contain code u ("uuuu"), if unknown.

s - Single known date/probable date
008/07-10 contain the date; 008/11-14 contain blanks (####).

t - Publication date and copyright date

u - Continuing resource status unknown
008/07-10 contain a beginning date of publication; 008/11-14 contain the characters *uuuu* since no ending date is known.

MARC 21 Concise Format for Bibliographic Data: 008: All Materials (Network Development and MARC - Windows Internet Explorer)

http://www.loc.gov/marc/bibliographic/concise/bd008a.html

MARC 21 Concise Format for Bibliographic Data: ...

u - Date element is totally or partially unknown
 ||| - No attempt to code

15-17 - Place of publication, production, or execution
 Two- or three-character alphabetic code that indicates the place of publication, production, or execution. Place code is an authoritative-agency data element. Code from: [MARC Code List for Countries](#). Choice of a MARC code is generally related to information in field 260 (Publication, Distribution, etc. (Imprint)). The code recorded in 008/15-17 is used in conjunction with field 044 (Country of Producer Code) when more than one code is appropriate to an item. The first code in subfield \$a of field 044 is recorded in 008/15-17. Three fill characters (|||) may be used in place of a valid code, but their use in 008/15-17 is discouraged. The data in this field 008 data element is used for retrieval and duplicate detection in many systems. When fill is used in 008/15-17, all three positions must contain the fill character.

35-37 - Language
 Three-character alphabetic code that indicates the language of the item. Code from: [MARC Code List for Languages](#). Choice of a MARC code is based on the predominant language of the item. Three fill characters (|||) may also be used if no attempt is made to code the language or if non-MARC language coding is preferred (and coded in field 041 (Language code)).

38 - Modified record
 One-character code that indicates whether any data in a bibliographic record is a modification of information that appeared on the item being cataloged or that was intended to be included in the MARC record.
 Codes are assigned a priority (recorded in the order of the following list) that determines which code is input when more than one code applies to the item.

- Not modified
 d - Dashed-on information omitted
 o - Completely romanized/printed cards romanized
 r - Completely romanized/printed cards in script
 s - Shortened
 Some of the data was omitted because the data exceeded the maximum length allowed by the system used to create or process it.
 x - Missing characters
 Record contained characters that could not be converted to machine-readable form (e.g., incidental nonroman characters on predominantly roman alphabet records, mathematical symbols, etc.).
 | - No attempt to code

39 - Cataloging source
 One-character code that indicates the original cataloging source of the record. If the cataloging source is known, it is identified in subfield \$a of field 040 (Cataloging Source).

- National bibliographic agency
 c - Cooperative cataloging program
 Creator of the cataloging data is a participant (other than a national bibliographic agency) in a cooperative cataloging program.
 d - Other
 u - Unknown
 | - No attempt to code

MARC 21 Concise Format for Bibliographic Data: 008: Books (Network Development and MARC Standar - Windows Internet Explorer)

http://www.loc.gov/marc/bibliographic/concise/bd008b.html

MARC 21 Concise Format for Bibliographic Data: ...

23 - Form of item (006/06)
 One-character alphabetic code that specifies the form of material for the item.
 # - None of the following
 a - Microfilm
 b - Microfiche
 c - Microopaque
 d - Large print
 f - Braille
 r - Regular print reproduction
 Eye-readable print, such as a photocopy.
 s - Electronic
 | - No attempt to code

24-27 - Nature of contents (006/07-10)
 Up to four one-character codes (recorded in alphabetical order) that indicate whether a significant part of the item is or contains certain types of material. If fewer than four codes are assigned, the codes are left justified and unused positions contain blanks (#).
 # - No specified nature of contents
 a - Abstracts/summaries
 Abstracts or summaries of other publications. Not used when a publication includes an abstract or summary of its own content.
 b - Bibliographies
 c - Catalogs
 Also includes lists of collectible objects, such as stamps and coins, or trade catalogs, etc. For catalogs of books, sound recordings, or motion pictures, code b (Bibliographies), code k (Discographies), or code q (Filmographies), are given with code c.
 d - Dictionaries
 e - Encyclopedias
 f - Handbooks
 g - Legal articles
 i - Indexes
 Index to bibliographical material *other* than itself.
 j - Patent document
 k - Discographies
 l - Legislation
 Full or partial texts of enactments of legislative bodies, published either in statute or in code form, or texts of rules and regulations issued by executive or administrative agencies.
 m - Theses
 Thesis, dissertation, or work identified as having been created to satisfy the requirements for an academic certification or degree.
 n - Surveys of literature in a subject area
 Composed entirely of authored surveys that summarize what has been published about a subject.

MARC 21 Concise Format for Bibliographic Data: 008: All Materials (Network Development and MARC - Windows Internet Explorer)

http://www.loc.gov/marc/bibliographic/concise/bd008a.html

MARC 21 Concise Format for Bibliographic Data: ...

||| - No attempt to code

15-17 - Place of publication, production, or execution
 Two- or three-character alphabetic code that indicates the place of publication, production, or execution. Place code is an authoritative-agency data element. Code from: [MARC Code List for Countries](#). Choice of a MARC code is generally related to information in field 260 (Publication, Distribution, etc. (Imprint)). The code recorded in 008/15-17 is used in conjunction with field 044 (Country of Producer Code) when more than one code is appropriate to an item. The first code in subfield \$a of field 044 is recorded in 008/15-17. Three fill characters (|||) may be used in place of a valid code, but their use in 008/15-17 is discouraged. The data in this field 008 data element is used for retrieval and duplicate detection in many systems. When fill is used in 008/15-17, all three positions must contain the fill character.

35-37 - Language
 Three-character alphabetic code that indicates the language of the item. Code from: [MARC Code List for Languages](#). Choice of a MARC code is based on the predominant language of the item. Three fill characters (|||) may also be used if no attempt is made to code the language or if non-MARC language coding is preferred (and coded in field 041 (Language code)).

38 - Modified record
 One-character code that indicates whether any data in a bibliographic record is a modification of information that appeared on the item being cataloged or that was intended to be included in the MARC record.
 Codes are assigned a priority (recorded in the order of the following list) that determines which code is input when more than one code applies to the item.

- Not modified

d - Dashed-on information omitted

o - Completely romanized/printed cards romanized

r - Completely romanized/printed cards in script

s - Shortened

Some of the data was omitted because the data exceeded the maximum length allowed by the system used to create or process it.

x - Missing characters
 Record contained characters that could not be converted to machine-readable form (e.g., incidental nonroman characters on predominantly roman alphabet records, mathematical symbols, etc.).

| - No attempt to code

39 - Cataloging source
 One-character code that indicates the original cataloging source of the record. If the cataloging source is known, it is identified in subfield \$a of field 040 (Cataloging Source).

- National bibliographic agency

c - Cooperative cataloging program
 Creator of the cataloging data is a participant (other than a national bibliographic agency) in a cooperative cataloging program.

d - Other

u - Unknown

| - No attempt to code

DEFINITION AND SCOPE

Internet | Protected Mode: On 100%

MARC 21 Concise Format for Bibliographic Data: 852: Location (Network Development and MARC Stan - Windows Internet Explorer)

http://www.loc.gov/marc/bibliographic/concise/bd852.html

MARC 21 Concise Format for Bibliographic Data: ...

852 - Location (R)

MARC 21 Bibliographic - Concise **2007**

Identifies the organization holding the item or from which it is available. May also contain detailed information about how to locate the item in a collection.

Indicators

First - Shelving scheme

- # - No information provided
- 0 - Library of Congress classification
- 1 - Dewey Decimal classification
- 2 - National Library of Medicine classification
- 3 - Superintendent of Documents classification
- 4 - Shelving control number
- 5 - Title
- 6 - Shelved separately
- 7 - Source specified in subfield \$2
- 8 - Other scheme

Second - Shelving order

- # - No information provided
- 0 - Not enumeration
- 1 - Primary enumeration
- 2 - Alternative enumeration

Subfield Codes

- Sa - Location (NR)
 - Institution or person holding the item or from which access is given. Contains a MARC code of the holding institution or the name of the institution or person. See Appendix: [Organization Code Sources](#).
- Sb - Sublocation or collection (R)
 - Specific department, library, etc., within the holding organization in which the item is located or from which it is available.
- Sc - Shelving location (R)
- Sd - Former shelving location (R)
- Se - Address (R)
 - Street address, city, state, zip code, and country information for the current physical location of the item.
- Sf - Coded location qualifier (R)
 - Three-character code that identifies the specific issues of the item that are located apart from the main holdings of the same item. Subfield Sf immediately follows the subfield Sa, Sb, or Sc being qualified.

Internet | Protected Mode: On 100%

MARC 21 Concise Format for Bibliographic Data: 852- Location (Network Development and MARC Stan - Windows Internet Explorer)

http://www.loc.gov/marc/bibliographic/concise/bd852.html

MARC 21 Concise Format for Bibliographic Data: ...

Sf - Coded location qualifier (R)
 Three-character code that identifies the specific issues of the item that are located apart from the main holdings of the same item. Subfield Sf immediately follows the subfield Sa, Sb, or Sc being qualified.

1 p - Qualifier type
 One-character alphabetic code indicates if it is the latest or previous time or part unit that is housed in a different location.
 1 - Latest/Latest, including the current, time or part unit is housed in a different location.
 p - Previous/Previous, not including the current, time or part unit is housed in a different location.

1-9 - Number of units
 One-character number (1-9) specifies the number of time or part units that are housed in a different location. When a number is not required to identify the specific units, this character position contains a blank (#). If the number of time or parts units exceeds 9, they may be contained in subfield Sg (Non-coded location qualifier) and this character position contains a blank (#).
 When Qualifier type is Latest (code 1), the number includes the current time or part unit. When Qualifier type is Previous (code p), the number does not include the current time or part unit.
 # - No information provided
 1-9 - Number of units

m, w, y, e, i, s - Unit type
 One-character alphabetic code describes either the time period or the part that is housed in a different location.
 m - Month(s) time
 w - Week(s) time
 y - Year(s) time
 e - Edition(s) part
 i - Issue(s) part
 s - Supplement(s) part

Sg - Non-coded location qualifier (R)
 Textual description that is used when the codes in subfield Sf (Coded location qualifier) are inadequate for describing the unit that is located apart from the main holdings of the same item. Subfield Sg immediately follows the subfield Sa, Sb, or Sc being qualified.

Sh - Classification part (NR)
 Si - Item part (R)
 Sj - Shelving control number (NR)
 Sk - Call number prefix (R)
 Sl - Shelving form of title (NR)
 Shelving title of an unclassified item that is shelved by title.
 Sm - Call number suffix (R)
 Sn - Country code (NR)
 Two- or three-character MARC code for the principal location contained in subfield Sa (Location). Code from: [MARC Code List for Countries](#).
 Sp - Piece designation (NR)
 Identification of a single piece when the holdings information does not contain an 863-865 (Enumeration and Chronology) or 876-878 (Item Information) field that contains a subfield Sp (Piece designation).
 Sq - Piece physical condition (NR)

MARC 21 Concise Format for Bibliographic Data: 852- Location (Network Development and MARC Stan - Windows Internet Explorer)

http://www.loc.gov/marc/bibliographic/concise/bd852.html

MARC 21 Concise Format for Bibliographic Data: ...

Sq - Piece physical condition (NR)
 Description of any unusual characteristic of the physical condition of the piece when the holdings information does not contain an 863-865 (Enumeration and Chronology) or 876-878 (Item Information) field that contains a subfield Sq (Piece physical condition).

Ss - Copyright article-fee code (R)

St - Copy number (NR)
 Copy number or a range of numbers for copies that have the same location and call number when the holdings information does not contain an 863-865 Enumeration and Chronology field that contains subfield St (Copy number).

Su - Uniform Resource Identifier (R)
 Uniform Resource Identifier (URI), for example a URL or URN, which provides electronic access data in a standard syntax. The URI links to the repository that holds the item (regardless of whether the item is analog or digital). This information may also be recorded as an organization code or text in subfield Sa (Location) and (if applicable) subfield Sb (Sublocation).

Sx - Nonpublic note (R)
 Sz - Public note (R)

S2 - Source of classification or shelving scheme (NR)
 MARC code that identifies the source from which the classification or shelving was assigned. It is used only when the first indicator position contains value 7 (Source specified in subfield S2). Code from: [MARC Code Lists for Relators, Sources, Description Conventions](#).

S3 - Materials specified (NR)

S6 - Linkage (NR)
 See description of this subfield in Appendix A: [Control Subfields](#).

S8 - Sequence number (NR)
 To sequence related holdings records, see field 852, subfield S8 in the [MARC 21 Format for Holdings Data](#).

MARC 21 Concise Format for Bibliographic Data: 856 Electronic Location and Access (Network Dev - Windows Internet Explorer)

http://www.loc.gov/marc/bibliographic/concise/bd856.html

MARC 21 Concise Format for Bibliographic Data: ...

856 - Electronic Location and Access (R)

2007

MARC 21 Bibliographic - Concise

Information needed to locate and access an electronic resource. The field may be used in a bibliographic record for a resource when that resource or a subset of it is available electronically. In addition, it may be used to locate and access an electronic version of a non-electronic resource described in the bibliographic record or a related electronic resource.

See the [Guidelines for the Use of Field 856](#) for a more thorough discussion on the use of field 856.

Field 856 is repeated when the location data elements vary (the URL in subfield \$u or subfields \$a, \$b, \$d, when used). It is also repeated when more than one access method is used, different portions of the item are available electronically, mirror sites are recorded, different formats/resolutions with different URLs are indicated, and related items are recorded.

Indicators

First - Access method

- # - No information provided
- 0 - Email
- 1 - FTP
- 2 - Remote login (Telnet)
- 3 - Dial-up
- 4 - HTTP
- 7 - Method specified in subfield \$2

Second - Relationship

- # - No information provided
- 0 - Resource
- 1 - Version of resource
- 2 - Related resource
- 8 - No display constant generated

Subfield Codes

\$a - Host name (R)
Fully qualified domain (host name) of the electronic location. It contains a network address which is repeated if there is more than one address for the same host.

\$b - Access number (R)
Access number associated with a host. It can contain the Internet Protocol (IP) numeric address if the item is an Internet resource, or a telephone number if dial-up access is provided through a telephone line. This data may change frequently and may be generated by the system, rather than statically stored.

\$c - Compression information (R)

MARC 21 Concise Format for Bibliographic Data: 856 Electronic Location and Access (Network Dev - Windows Internet Explorer)

http://www.loc.gov/marc/bibliographic/concise/bd856.html

MARC 21 Concise Format for Bibliographic Data: ...

\$c - Compression information (R)
Information about the compression of a file, in particular, whether a specific program is required to decompress the file.

\$d - Path (R)

\$f - Electronic name (R)

\$h - Processor of request (NR)
Username, or processor of the request; generally the data which precedes the *at sign* (\$) in the host address.

\$i - Instruction (R)
Instruction or command needed for the remote host to process a request.

\$j - Bits per second (NR)

\$k - Password (NR)

\$l - Logon (NR)
Characters needed to connect (i.e., *logon*, *login*, etc.) to an electronic resource or FTP site. Used to record general-use logon strings which do not require special security.

\$m - Contact for access assistance (R)

\$n - Name of location of host (NR)
Conventional name of the location of the host in subfield \$a, including its physical (geographic) location.

\$o - Operating system (NR)

\$p - Port (NR)
Portion of the address that identifies a process or service in the host.

\$q - Electronic format type (NR)
Identification of the electronic format type, which is the data representation of the resource, such as text/HTML, ASCII, Postscript file, executable application, or JPEG image. Electronic format type may be taken from enumerated lists such as registered Internet Media Types (MIME types).

\$r - Settings (NR)

\$s - File size (R)

\$t - Terminal emulation (R)

\$u - Uniform Resource Identifier (R)
Uniform Resource Identifier (URI), which provides standard syntax for locating an object using existing Internet protocols. Field 856 is structured to allow for the creation of a URL from the concatenation of other separate 856 subfields. Subfield \$u may be used instead of those separate subfields or in addition to them.

Subfield \$u may be repeated only if both a URN or a URL or more than one URN are recorded.

\$v - Hours access method available (R)

\$w - Record control number (R)

\$x - Nonpublic note (R)

\$y - Link text (R)

\$z - Public note (R)

\$2 - Access method (NR)
Access method when the first indicator position contains value 7.

\$3 - Materials specified (NR)

\$6 - Linkage (NR)
See description of this subfield in [Appendix A - Control Subfields](#)

MARC 21 Concise Format for Bibliographic Data: 856 Electronic Location and Access (Network Dev - Windows Internet Explorer)

http://www.loc.gov/marc/bibliographic/concise/bd856.html

MARC 21 Concise Format for Bibliographic Data: ...

\$6 - Linkage (NR)
See description of this subfield in Appendix A: [Control Subfields](#).

\$8 - Field link and sequence number (R)
See description of this subfield in Appendix A: [Control Subfields](#).

Windows Internet Explorer window showing the iBistro for the ONE Library Consortium website. The browser address bar shows the URL: <http://www.onelibraryne.org/uhtbin/cgiirsi.exe/uzx2WYH4BE/NPL/181440015/60/69/X>.

The website header includes the title "iBistro at ... The ONELibrary Consortium" and a "Login to the e-Library OPAC" button. A navigation menu contains: Library Catalog, Reference Librarian, Kids' Library, I Need Material, Knowledge Portal, Reserve Desk, Information Desk, My Account, and Contact Us. Below the menu are links for "Go Back", "Help", and "Logout".

The main content area features a search box with a "Search for" field and a "library: ALL" dropdown. Search filters include "words or phrase", "author", "title", "subject", "series", and "periodical title". A "Power Search" button is located below the filters.

Three columns of featured content are displayed:

- Recommended Reading:** Agatha Award (Mystery), Anthony Award (Mystery), Man Booker Prize for Fiction, Caldecott Medal (Children's), Carnegie Award (Children's), and More recommended reading lists.
- Best Sellers:** New York Times Fiction, New York Times Nonfiction, New York Times Children's Chapter Books, Publishers Weekly Fiction, Publishers Weekly Nonfiction, and More best seller lists.
- Hot Sites...:** The Big Read, History of Jamestown, and The Olympic Movement.

A "What Others Are Reading" section lists:

- Hottest title:** Paperback books ephemeral
- Hottest author:** Berenstain, Stan
- Hottest subject:** Dogs--Juvenile fiction.

At the bottom, there is a "Powered by: SirsiDynix" logo, the text "iBistro at ... The ONELibrary Consortium Copyright © 2000 - 2005, SirsiDynix", and a "TOP" link.

Windows Internet Explorer window showing the same iBistro website, but with the search dropdown menu open. The browser address bar shows the URL: <http://www.onelibraryne.org/uhtbin/cgiirsi.exe/BFJKKNGW4A/NPL/148970010/60/69/X>.

The search dropdown menu is expanded, showing a list of library options:
