DEFINITION AND SCOPE

6XX fields contain subject access entries and terms. Most of these fields contain subject added entries or access terms based on the lists and authority files identified in the second indicator (Subject heading system/thesaurus) or in subfield $2 (Source of subject heading or term). One field contains uncontrolled subject access data.

For **mixed materials** and collections under archival control, considerable use is made of the 6XX fields to reflect the subject content of the described materials through controlled and uncontrolled headings and terms. The 7XX fields are used less frequently to provide access.

Descriptions of the first indicator and all subfield codes, as well as input conventions for the 600, 610, 611, and 630 fields, are given in the following *General Information* sections: *X00, X10, X11 and X30*. The second indicator is described in the specific section for each field. All content designators for the 650-658 fields are described in the

"**Full**" documentation refers to the *MARC 21 Format for Bibliographic Data* that contains detailed descriptions of every data element, along with examples, input conventions and history sections.

810 - Series Added Entry - Corporate Name (R) Full | Concise
811 - Series Added Entry - Meeting Name (R) Full | Concise
830 - Series Added Entry - Uniform Title (R) Full | Concise

FIELD DEFINITION AND SCOPE

Fields 800-830 contain series added entries for series associated with a title. These fields are used to trace a series added entry when the form of series present in the 490 Series Statement field cannot serve additionally as a series added entry. An 8XX series added entry field is not used in conjunction with the 440 field, which functions both as a series statement and as a series added entry.

A description of the first indicator and all subfield codes, as well as input conventions for the 800, 810, 811, and 830 fields, are given in the following General Information sections: X00, X10, X11, and X30. The second indicator is described in the specific section for each field.

CONTENT DESIGNATOR HISTORY

Field 840 - Series Added Entry - Title [OBSOLETE, 1980]
Field 840 was made obsolete when the decision was made to use field 830 for both uniform titles and conventional titles that are not entered under a name. For field 840, the first indicator was undefined; the second was defined for nonfiling characters (values 0-9). The subfield codes were: $a (Title), $h (Medium), $v (Volume or number).
