DEFINITION AND SCOPE

6XX fields contain subject access entries and terms. Most of these fields contain subject added entries or access terms based on the lists and authority files identified in the second indicator (Subject heading system/thesaurus) or in subfield $2 (Source of subject heading or term). One field contains uncontrolled subject access data.

For **mixed materials** and collections under archival control, considerable use is made of the 6XX fields to reflect the subject content of the described materials through controlled and uncontrolled headings and terms. The 7XX fields are used less frequently to provide access.

Descriptions of the first indicator and all subfield codes, as well as input conventions for the 600, 610, 611, and 630 fields, are given in the following *General Information* sections: *X00, X10, X11 and X30*. The second indicator is described in the specific section for each field. All content designators for the 650-655 fields are described in the
