## “Classifying with the DDC” Section 5 of the Introduction

- Determining the Subject of a work
- Determining the Discipline of a work
- More than one Subject in the same Discipline
- One or more Subjects in more than one Discipline
- Table of last resort

## Number Building/Subdivisions

- Used to further group like with like
- Help organize large number of items within a topic
- Define more facets of an item

## Number Building/Subdivisions

- As instructed, may sometimes add numbers from another class or division before adding subdivision

## Standard Subdivisions

- Optional
- Recommended for a large number of items within a specific topic

## Facets defined by Subdivisions listed in Tables

- Format (e.g. dictionary, serial, catalog)
- Approach/Viewpoint of author (e.g. history, philosophy, criticism of a work)
- People (e.g. women, gifted persons)
- Location (e.g. torrid zone, Greater London)
- Literary form (e.g. poetry, drama)
- Use of language (e.g. grammar, etymology)

## Source of Subdivisions/Instructions for adding Subdivisions

- Tables
- In Abridged DDC, four tables are used (as opposed to six tables in the full DDC)
- Schedules
- Introduction 8.1-8.18
- Manual

**Notes**

The following notation is never used alone, but may be used as required with any number from the schedules, e.g., workbooks ([T1-076](#) in this table) in arithmetic ([513](#)): [513.076](#). When adding to a number from the schedules, always insert a decimal point between the third and fourth digits of the complete number. (Full instructions on the use of standard subdivisions are found in the Introduction to the Dewey Decimal Classification)

Standard subdivisions should be added only when the work in hand covers the whole, or approximately the whole, subject of the number in the schedules

When standard subdivision notation from Table 1 is listed in Tables 2 through 4 and in the schedules, all of its subdivisions as given in this table may be used. Other Table 1 notation that is not listed in the schedules may also be used. For example, the fact that [610.7](#) is listed does not exclude the use of [610.71](#) or [610.8](#)

Do not add one standard subdivision to another standard subdivision unless specifically instructed. Numbers in the schedules that look as though they were built with notation from this table but have headings with broader or different meanings are not considered "standard" subdivisions. Hence notation from Table 1 may be added to such schedule numbers

If the 0 subdivisions of a number in a schedule are used for special purposes, use 001-009 for standard subdivisions

**Notes**

The following notation is never used alone, but may be used as required with any number from the schedules, e.g., workbooks ( [T1-076](#) in this table) in arithmetic ( [513](#) : [513.076](#) ). When adding to a number from the schedules, always insert a decimal point between the third and fourth digits of the complete number. (Full instructions on the use of standard subdivisions are found in the Introduction to the Dewey Decimal Classification)

Standard subdivisions should be added only when the work in hand covers the whole, or approximately the whole, subject of the number in the schedules

When standard subdivision notation from Table 1 is listed in Tables 2 through 4 and in the schedules, all of its subdivisions as given in this table may be used. Other Table 1 notation that is not listed in the schedules may also be used. For example, the fact that [610.7](#) is listed does not exclude the use of [610.71](#) or [610.8](#)

Do not add one standard subdivision to another standard subdivision unless specifically instructed. Numbers in the schedules that look as though they were built with notation from this table but have headings with broader or different meanings are not considered "standard" subdivisions. Hence notation from Table 1 may be added to such schedule numbers

If the 0 subdivisions of a number in a schedule are used for special purposes, use 001-009 for standard subdivisions

Including laboratory manuals used in research; qualitative research, quantitative research; scientific method; descriptive, experimental, historical, statistical methods; research and scientific techniques not provided for elsewhere in Table 1

Class here action research, evaluation research

Class operations research, statistical methods used in systems analysis in [T1-01](#) ;

Class the statistics themselves (no matter how presented) in [T1-02](#) ;

Class financial support of research in [T1-079](#) ;

Class results of research in 001-999 without adding notation T1-072 from Table 1 ;

Class interdisciplinary works on research in [001.4](#) .

For scientific method used in systems analysis , see [T1-01](#) .

For a specific research or scientific technique provided for elsewhere in Table 1 , see the technique , e.g., mathematical techniques [T1-01](#) , testing [T1-028](#) , data processing [T1-0285](#) .

See also [T1-02](#) for works containing the statistics themselves .

## Classify book...

### *Manual of Research Statistics for Chemical Engineers*

- Classify with Chemical engineering...: 660.072

## Variations in adding subdivisions

- Add subdivision as is from Table
- Drop lead zero(s) after an existing zero
- Retain lead zero after an existing zero
- Add an extra zero
