

You Can Do This—Bring Fiber to Your Public Library

Top 5 Reasons Why You Should Participate in the **Nebraska E-rate Special Construction Matching Fund**:

1. No obligation. Test the waters, file your application, and weigh the pros and cons. No salesperson will visit your home.
2. Most, or in some cases, all, of the cost of bringing fiber to your library will be covered. Contact us to find out what % is covered, and what % not covered. Did we mention there's no obligation for finding out?
3. Be at the frontline of the broadband game, and get your project completed NOW. Before rural residential broadband projects are funded and completed or the funding ends.
4. Help is available. Contact us at Nebraska Library Commission for consultations, help with project planning, and even assistance with filing the no-obligation forms. We also provide help with filtering (required for E-rate and special construction), consultations for cybersecurity, and consultations for improving your network equipment.
5. Your community benefits and they will thank you. Is your library beneficial to your community? Yep, we thought so. That's why providing fiber connections enhances your role as a community anchor institution, digital equity partner, and allows your library to provide valuable programs and services to your community.

For more information about this program, contact:

Holly Woldt
