2.13	Street Address	
2.14	City	
2.15	5-digit Zip code

2.20	Library Building(s) square footage	
2.21	Number of Bookmobiles in the Bookmobile Outlet Record	
2.22	Hours open for public service per year for each outlet, including central units, branches, and bookmobiles. Minor variations in public service hours need not be included. Extensive hours closed to the public due to natural disasters or other events should be excluded from the count.	
2.23	Number of weeks per year each library outlet is open. For each bookmobile, count only the weeks during which the bookmobile is open to the public. The count should be based on the number of weeks that a library outlet was open for half or more of its scheduled service hours. Extensive weeks closed to the public due to natural disasters or other events should be excluded from the count. Do not calculate based on total number of service hours per year at the outlet level. For example, by dividing total hours by the average hours open per week. Round to the nearest whole number of weeks. If the library was open half or more of its scheduled hours in a given week, round up to the next week. If the library was open less than half of its scheduled hours, round down	
2.24	Number of weeks during the year that due to the Coronavirus (COVID-19) pandemic, an outlet building was physically closed and the public could not enter, when it otherwise would have been open. NOTE: Round to the nearest whole number. If building did not close to the public due to the pandemic, enter zero. The sum of 2.23 and 2.24 should equal or be fewer than 52 weeks. An outlet is considered physically closed when the public cannot access any library buildings or bookmobiles, regardless of staff access. A building can be physically closed but still offer virtual, Wi-Fi, or "curbside" services outside the building.	
2.25	Number of weeks during the year that an outlet implemented limited public occupancy practices for in-person services at the library building in response to the Coronavirus (COVID-19) pandemic. NOTE: Round to the nearest whole number. If building did not have a limited occupancy or similar practice due to the pandemic, enter zero. Number should not be greater than 2.23. Limited public occupancy practices can include reduced hours open, limits on the number of public members inside the physical building, appointment only on-site library use, visitor time limits, closed stacks or meeting rooms, etc.	
2.26	Legal Basis Code	
2.27	Administrative Structure Code	
2.28	Geographic Code	
2.29	FSCS Public Library Definition	
2.30	Interlibrary Relationship Code

2.34	Were any of the library's outlets physically closed to the public for any period of time due to the Coronavirus (COVID-19) pandemic?	

	NOTE: An outlet is considered physically closed when the public cannot access any library buildings or bookmobiles, regardless of staff access. A building can be physically closed but still offer virtual, Wi-Fi, or "curbside" services outside the building.

Under this category, report only items the library has acquired as part of the collection, whether purchased, leased, licensed, or donated as gifts.

Electronic Books (E-Books): E-books are digital documents (including those digitized by the library), licensed or not, where searchable text is prevalent, and which can be seen in analogy to a printed book (monograph). Include e-books held locally and remote e-books for which permanent or temporary access rights have

been acquired. Report the number of physical or electronic units, including duplicates, for all outlets. For smaller libraries, if volume data are not available, the number of titles may be counted. E-books packaged together as a unit (e.g., multiple titles on a single ebook reader) and checked out as a unit are counted as one unit. Please **exclude** public domain / uncopyrighted e-books that have unlimited access (e.g., Project Gutenberg).

Report the number of units. Report only items the library has selected as part of the collection.
NOTE: For purposes of this survey, units are defined as “units of acquisition or purchase”. The “unit” is determined by considering whether the item is restricted to a finite number of simultaneous users or an unlimited number of simultaneous users.

Finite simultaneous use: units of acquisition or purchase is based on the number of simultaneous usages acquired (equivalent to purchasing multiple copies of a single title). For example, if a library acquires a title with rights to a single user at a time, then that item is counted as 1 “unit”; if the library acquires rights to a single title for 10 simultaneous users, then that item is counted as 10 “units”

Unlimited simultaneous use: units of acquisition or purchase is based on the number of titles acquired. For example, if a library acquires a collection of 100 books with unlimited simultaneous users, then that collection would be counted as 100 “units”.

Do not include electronic collections that are provided by third parties and freely linked to on the web.

Description and Use of Locally Funded Electronic Collections/Databases: Description and Use of Electronic Collections: We would like to know which electronic collections/databases the library provides (not including *NebraskAccess*), and the number of annual uses. Count each item downloaded or each session as a "use". *Do not count searches as uses.*

Programs: A program is any planned event which introduces the group of attending to any of the broad range of library services or activities or which directly provides information to participants.

Children's Programs, Age 0-5: A program session targeted at children ages 0-5 is any planned event for which the primary audience is infants, toddlers, or preschool-age children. Examples of these types of program sessions include, but are not limited to, story hours, every child ready to read programs, musical or sing-along events, and puppet shows. Children's Programs, Age 6-11: A program session targeted at children ages 6-11 is any planned event for which the primary audience is elementary-school-age children. Examples of these types of program sessions include, but are not limited to, story hours, science events, crafting classes, and summer reading events. Examples of these types of program sessions include, but are not limited to, family game nights, holiday events, storytelling programs, or chess clubs. Include all programs here that do not fit into the other age category elements. Each program session should only be counted in one age category based on its primary target audience; do not include program sessions here that have already been counted in earlier age category elements. Avoid including program sessions that are targeted at more than one non-adult age category (and are not targeted at adults); these should be counted in the child or young adult age category that best represents the target audience.

Each program session should only be counted in one category based on its primary target audience.

There are three categories for live programs offered by the library, and various age groups for target audiences.

1. **Live, In-Person Onsite Programs:**

An in-person onsite program session is any planned event that includes an in-person attendance option and takes place at library facilities. Examples include, but are not limited to, a job skills class in the library or a nature program on the library grounds. Regardless of the number of formats in which a program session is offered, each program session should only be counted once and in one format category. Include in-person program sessions that also have a virtual attendance option and count them as a single program session.

Attendance: The count of in-person attendance at program sessions that take place at library facilities. Regardless of the number of formats in which a program session is offered, each attendee should only be counted once. Each attendee should be counted in the format category in which they attended the program session. For in-person onsite programs that also have a virtual component, exclude virtual attendance; this should be counted under Live, Virtual Program Attendance.

2. **Live, In-Person Offsite Programs:**

An in-person offsite program session is any planned event that includes an in-person attendance option and takes place somewhere other than the library or the library grounds. Examples include, but are not limited to, facilitating a book club at a local nursing home, hosting a storytime at a local farmer's market, or visiting a school to present about library services. Regardless of the number of formats in which a program session is offered, each program session should only be counted once and in one format category. Include in-person program sessions that also have a virtual attendance option and count them as a single program session.

Attendance: The count of in-person attendance at program sessions that take place somewhere other than the library. Regardless of the number of formats in which a program session is offered, each attendee should only be counted once. Each attendee should be counted in the format category in which they attended the program session. For in-person offsite programs that also have a virtual component, exclude virtual attendance; this should be counted under Live, Virtual Program Attendance.

3. **Live, Virtual Programs:**

A live virtual program session is any planned event that is streamed virtually and can be viewed live as it progresses (i.e., live-streaming). Regardless of the number of formats in which a program session is offered, each program session should only be counted once and in one format category. Include virtual program sessions that are also recorded. Include program sessions hosted on Facebook Premiere that are facilitated by a staff member. Count virtual program sessions at the administrative entity level; do not duplicate numbers at each branch. Exclude program sessions that also have an in-person component; these should be counted under Live In-Person Onsite Program Sessions or Live In-Person Offsite Program Sessions.

Attendance: The count of live attendance at virtual program sessions. Regardless of the number of formats in which a program session is offered, each attendee or view should only be counted once. Each attendee should be counted in the format category in which they attended or viewed the program session. Count each participant device connected to a virtual program as a single attendee. For program sessions hosted on Facebook Live, YouTube Live, or similar platforms, count peak concurrent viewers. For those hosted on videoconferencing platforms, count the maximum number of non-staff participants during the session.

For virtual program sessions that are also recorded for later, on-demand, asynchronous viewing, exclude views that occur after the session has ended; these should be counted under Total Views of Virtual Program Presentations. For program sessions that also have an in-person component, exclude in-person attendance; this should be counted under Live In-Person Onsite Program Attendance or Live In-Person Offsite Program Attendance.

4. **Recorded Program Presentations:** A recorded program presentation is any recording of program content that cannot be viewed live as it unfolds (i.e., on-demand streaming). Only include program presentations posted during the reporting period. Regardless of the number of platforms on which a presentation is posted, count each unique presentation only once. Include program sessions hosted on Facebook Premiere that are not facilitated by a staff member. Count asynchronous program presentations at the administrative entity level; do not duplicate numbers at each branch. Include recordings of synchronous program sessions that were available for

asynchronous viewing after the session ended. Recorded program presentations are NOT counted by age group (only one count for all recorded presentations).

Views: Report the number of views of recorded program presentations for a period of seven (7) days after the presentation was posted, even if that period extends beyond the survey reporting period (or fiscal year). For program presentations made available via Facebook, count unique 1-minute views of each video. For those made available via other platforms, count unique views of each video.

Self-directed Activities (aka “drop-in activities” or “passive activities”). A Self-directed Activity is a planned, independent activity available for a definite time period which introduces participating individuals to any of the broad range of library services or activities which directly provide information to participants. Activities differ from programs in that activities are unstructured and depend on the participation of the attendee to create the experience, rather than a structured presentation offered by library staff or volunteers to a group at a set time. Examples of passive activities include DIY stations, 1,000 Books Before Kindergarten, Frequent Reader Clubs, and Take and Make kits. This does not include informal services such as homework help. Count all activities, whether held on- or off-site, that are sponsored or co-sponsored by the library. Exclude activities sponsored by other groups that use library facilities.

6.1	Name of Automation Software/Integrated Library System (ILS)	
6.2	Public Internet Access Provided?	
6.3	Number of Internet computers used by the public	
6.4	Name of Internet Filtering Software used (if applicable) <i>Please note: we are asking here about software used to block certain web sites from displaying, not anti-virus or anti-spyware programs.</i>	
6.5	Internet Service Provider	
6.6	Type of Primary Internet Connection.	
6.7	Wireless Internet access available for patrons?	

Report the number of wireless sessions provided by the library wireless service annually. ***If a count is not available by using methods like hardware logging or network scanning, enter NA.*** Count one session for each time a device connects to the library's wireless network, regardless of the duration of connection. If possible, only count sessions for patron devices and exclude library devices such as routers, access points, printers, and public access computers; otherwise, if patron devices cannot be isolated, report sessions for all devices.

NOTE: If an annual count of wireless sessions is unavailable, count wireless sessions during a typical week or weeks ***using methods like hardware logging or network scanning, and multiply the count to represent an annual estimate. (Do not conduct visual surveys of devices in use as a method to establish a count of a typical week.)*** A "typical week" is a time that is neither unusually busy nor unusually slow. Avoid holiday times, vacation periods for key staff, or days when unusual events are taking place in the community or in the library. Choose a week in which the library is open its regular hours.

6.9	Regarding the number of Wireless Internet sessions/logins, is this an annual <i>count</i> or an annual <i>estimate</i> based on a typical week or weeks?

6.11	Does your library have a makerspace?	

Virtual Library Visits: Unique visitors is the number of inferred individual people as determined by IP address (filtered for spiders and robots), within a designated reporting timeframe (***each day***), with activity consisting of one or more visits to a site. Each individual is counted only once in the unique visitor measure for the reporting period, in this case, ***each day***. The number of annual virtual visits can be calculated by summing the number of unique visitors each day for a one month time period. You may also report an annual figure based on a "typical week" (see definition below). Multiply by 52 weeks for an estimated annual total. A "typical week" is a week that is neither unusually busy nor unusually slow. Avoid holiday times, vacation periods for key staff, or days when unusual events are taking place in the community or the library. Choose a week in which the library is open its regular hours. Include seven consecutive calendar days, from Sunday through Saturday (or whenever the library is usually open).

NOTE: If your library has a website hosted by NLC, this number will be prefilled.

7.0 Staffing

Report figures as of the last day of the fiscal year. Include all positions funded in the library's budget whether those positions are filled or not. **Please note: this is not a measure of individuals, but of Full-Time Equivalent (FTE).** To ensure comparable data, 40 hours per week has been set as the measure of full-time equivalents (FTE). For example, 60 hours per week of part-time work by employees in a staff category divided by the 40-hour measure equals 1.50 FTEs. If you work 25 hours each week, your FTE would be $25 \div 40 = .625$.
